Page Approval by ServiceRocket

You can migrate data from the Page Approval plugin into the Approvals for Confluence App.

**Instructions**

1. Open the SettingsCog as a Confluence Administrator and click on 'Approval configuration'.
2. Click on the 'Migration' item in the Approvals for Confluence section.
3. Click on the 'Start Migration' button to migrate your existing data to the App.
4. This will begin the migration process, which could take several minutes.
5. If you go to a page with a Page Approval on it, you can see the byline contains the migrated data.

**Detailed Instructions**

1. Open the SettingsCog as a Confluence Administrator and click on 'Approval configuration'.

2. Click on the 'Migration' item in the Approvals for Confluence section.

![Approvals for Confluence menu](image2)

3. Click on the 'Start Migration' button to migrate your existing data to the App.
Approvals for Confluence

Migration

Migrate from an existing Approval App to the 'Approvals for Confluence' App.

Page Approvals for Confluence
ServiceRocket

Migrate any 'Page Approval' Macros to the Page Approval feature of this App.

Supported features:
- Approval History [TODO]
- Migrate Overall Status
- Migrate Approval Members (Users)
- Approval Member Status and Action Date
- Expiry Date
- Quorum Size

This is non-destructive and the plugin will continue to work.

Start Migration

4. This will begin the migration process, which could take several minutes.

5. If you go to a page with a Page Approval on it, you can see the byline contains the migrated data.
