Page Approvals

Page Approvals provide an easy-to-use Approval mechanism that works from the top of a page (no need to edit the page) and is easier to script with the REST API than the Macro feature.

They are a straight-forward way to get approvals for pages as a whole.

They're shown at the top of a Confluence page - just click on the 'Add Approval' link to start -

6. Lay out your page
7. Learn the wonders of autoconvert
8. Tell people what you think in a comment
9. Share your page with a team member
