

# Reports

The Reports tab of Cleaner for Jira provides access to a number of useful reports on your Jira system.

The available reports are:

- [System History Report](#) - see how your usage of Jira has changed over time, with a historical chart.
- [System Statistics Report](#) - see statistics on your usage of the configuration items (shows used/unused items).
- [Audit Log Report](#) - view the latest logs that users have created using the features on the App.
- [Health Check Report](#) - see extended information on the built-in Health Checks.
- [Cleaner Usage Report](#) - see how you have used Cleaner for Jira and how many items you have disabled/deleted.
- [System Information Report](#) - see quick information on your systems' CPU and heap size usage.
