

Optimizer for Jira (Cleaner for Jira) Home

Server/Data Center v4

What's New in v4

This page provides an overview of the changes in Optimizer for Jira 4.0 (previously known as Cleaner for Jira).

The User Interface

Version 4 of Optimizer has a completely overhauled UI with a focus on usability and maximising of screen real estate.

Health Checks

This page describes the UI for health checks and contains the list of health checks we plan to implement and we have implemented.

Reporting

Tables

Optimizer V4 has support for most of Jira's configuration items.

Task System

V4 uses a new task system for most actions. This system runs changes in the background to stop timeouts and other similar issues.
