

Testing

We currently perform extensive functional testing on the following Jira versions:

- Jira 7.13.x (Enterprise Release)
- Jira 8.2.x (Latest Release)

We generally support any JIRA version released within the last 2 years and have versions that support previous versions from JIRA 7.1, however, future updates will increase the version of Jira required.

We have also performed [extensive performance and scalability testing](#) on Jira Data Center.
